Shahroud Journal of Medical Sciences

Author Declaration Form: Originality, AI Use, and Disclosures

1 Article and Corresponding Author Information

Article title: ……

……

Corresponding author: ……
Telephone: ……
Email: ……
Affiliation: ……

……

2 Originality, Publication Ethics, and Generative AI Use

I, ……, as the corresponding author and on behalf of all co-authors, declare that the submitted manuscript is original and that all authors have complied with applicable publication-ethics requirements. To the best of our knowledge, the work contains no plagiarism, research misconduct, data fabrication or falsification, or duplicate submission or publication. The data presented in this manuscript were derived from an approved thesis at the University of Tabriz, and the authors confirm the originality of the work.

Generative AI and AI-assisted tools — no-use declaration: We declare that no generative artificial-intelligence tool, including ChatGPT or any other large language model or AI-assisted writing tool, was used to draft, rewrite, translate, edit, or otherwise generate any part of the manuscript. We further declare that no such tool was used to create, suggest, verify, or alter any in-text citation or reference-list entry. All references and citations have been independently checked by the authors against the original sources, and the authors accept full responsibility for their accuracy and completeness.

The authors understand that any journal-specific policy on AI-assisted tools applies and that disclosure requirements may differ. The International Committee of Medical Journal Editors recommends disclosure when AI-assisted technology is used in preparing submitted work; this form records the authors' specific declaration of no use (ICMJE, "Use of AI by Authors").

Rights and permissions: The authors confirm that they have the authority to submit the manuscript and grant the publisher the rights required under the journal's applicable publication agreement. Any third-party tables, figures, images, or other materials have been appropriately credited and permission obtained where required.

3 Conflicts of Interest, Funding, and Related Declarations

Please select one answer for each item and provide details where applicable.

1. Funding: Have the authors or their institution received funding from any third party (including a government body, commercial organization, or private foundation) for any aspect of this work, including study design, data collection or monitoring, analysis, manuscript preparation, or publication?

☐ Yes ☐ No

If yes, please identify the funder and describe its role:

_____

2. Conflicts of interest: Do any authors have financial or non-financial relationships, activities, or interests that could be perceived to have influenced this work?

☐ Yes ☐ No

If yes, please provide details:

_____

3. Related patents: Do any authors have pending, under-review, or registered patents related to this work?

☐ Yes ☐ No

If yes, please provide details:

_____

4. Additional information: Is there any other means by which readers may obtain additional information about this work from the authors?

☐ Yes ☐ No

If yes, please provide details:

_____

The corresponding author confirms that the disclosures above have been reviewed with all co-authors and are complete and accurate.

4 Ethics Approval and Author Certification

Human participants or laboratory animals: Does this work involve human participants or laboratory animals and therefore require review and approval by an ethics committee?

☐ Yes ☐ No

Ethics committee name: _____

Approval/reference number: _____

(If not applicable, explain: _____.)

By signing below, I certify that the information in this form is accurate and complete, that all co-authors have approved the submitted manuscript and these declarations, and that I am authorized to sign on their behalf. I understand that the authors remain responsible for the integrity, accuracy, and originality of the submitted work.

Corresponding author's name: _____
